HPS PLAY COMPANY

INDOOR PLAYGROUNDS

Creative turnkey solution for your success

www.hps-playco.at

Are you planning to open an indoor playground? Then you need a comprehensive concept that offers fun for all age groups. With the indoor play concepts from HPS Play Company, you can continuously surprise your visitors.

Get inspired!

One of the Leading Providers of Comprehensive Leisure Concepts

For over 28 years, HPS Play Company has been one of the leading providers of trampoline parks, indoor playgrounds, and family entertainment concepts. From design to the finished product, HPS Play Company creates unique turnkey solutions tailored to any location and budget. With more than 900 projects completed, we are the market leader in German-speaking regions!

Success Starts with Planning

The design of your indoor playground begins with a thorough conversation. By combining your ideas with our expertise, experience, and creative designers, we craft an indoor playground that exceeds your expectations. After our initial meeting, our designers translate the concept into a 2D design, followed by a 3D presentation. Every concept is custom-made, ensuring that all of our playgrounds are truly unique. A one-of-a-kind design guarantees your success!

Safety & Regulations

The safety of your visitors is our top priority. All of our playground equipment and installations are built according to the latest safety standards. Upon delivery, we can also arrange for an independent expert to inspect and certify the entire playground to ensure full compliance with safety regulations.

Production & Installation

Once you're satisfied with the design, we refine the drawings down to the smallest detail. With seven production facilities across Europe, no project is too big for us. In addition, our field technicians have extensive experience installing projects both domestically and internationally. Wherever your location may be, HPS Play Company ensures a professional installation.

Let's play!

Comprehensive Support

HPS Play Company is with you every step of the way. Together, we develop your formula for success! We provide comprehensive advice on the design and setup of your venue, taking all the crucial details into account to make your business plan a success.

Fully Customized Theming

An indoor playground should create an unforgettable experience—a place where both children and parents can have fun. HPS Play Company offers numerous options for 2D and 3D theming, from wall murals and 3D elements like lifelike dinosaurs to a complete jungle setting with animals and vines. Nothing is too imaginative!

Get inspired!

Gain insight into the attractions possible for your indoor playground. From challenging play structures and climbing equipment to dedicated play areas for the little ones.

Play Structures

For years, our play structures have thrilled children aged 4 and up, delivering unforgettable play experiences. Our indoor playgrounds, made in Europe, stand out for their high capacity and endless design possibilities.

Customized for You

We optimize both the floor space and the height of your venue. With our expertise, you'll receive a tailored solution that perfectly meets the specific needs of your business.

Spider Climbing Towers

Children climb and crawl from top to bottom through elastic bands resembling a spider's web! Use the climbing tower as a standalone attraction or integrate it into a larger play structure. Available in various colors and sizes.

Kids Ninja Obstacle Course

The goal of the Kids Ninja Obstacle Course is to complete the course as quickly as possible. Children jump, crawl, and balance their way through the course. All the elements of a full-size Ninja obstacle course are present, but adapted to suit children's abilities. This way, every child feels like a true ninja!

Climbing Volcanoes

Climb up, feel on top of the world, slide down, and do it all over again—the Climbing Volcano is perhaps the most impressive of all play structures. Available in various sizes, shapes, and colors.

Softball Arenas

A softball arena is the perfect addition to any indoor playground, offering loads of fun. Make the area even more exciting by adding features like a ball shower, tipping bucket, or ball cannons for extra thrills!

Low Ropes Courses

Familiar with low ropes courses from outdoor playgrounds? We've revolutionized them for indoor spaces as well. The rope and wood elements perfectly complement play structures, adding a new dimension with an obstacle course feel.

Slides

No matter the age of your visitors, slides are always fun! HPS Play Company offers a wide variety of slides in all shapes and sizes. From spiral slides to free-fall slides, stainless steel slides, and large family slides, we provide the perfect solution for endless sliding fun to meet every need!

Donut Gliders

On a Donut Glider, your guests slide down at high speed on an inflatable tire. A fantastic sensation for all ages! This attraction can be installed both indoors and outdoors.

Toddler Areas

Our range includes soft play elements such as animal figures, block puzzles, play blocks, complete soft play islands, custom play corners, and mini play structures with small slides and baby trampolines. Made from foam and finished with PVC, these elements are flexible, soft, and easy to clean, ensuring safe play and hours of fun for young children.

Wooden playgrounds

Operators are increasingly looking for indoor play solutions that blend seamlessly into their surroundings while still offering the fun and safety of traditional indoor playgrounds. With over 28 years of experience, we have developed a product line made from natural materials like wood and rope that meets all these needs.

Bouncy Castles & Inflatables

In addition to classic bouncy castles, we offer inflatable slides, obstacle courses, and more to enhance your play areas with added excitement. Bouncy castles are a perfect, cost-effective, and easy-to-set-up addition. Custom inflatables are also available—you'll be amazed at what we can create!

Children's Trampolines

As a leading manufacturer of trampoline parks, this attraction is a must in HPS Play Company's range. A children's trampoline provides hours of bouncing fun for the little ones. It's the perfect way for kids to get introduced to trampoline jumping.

Tip: Add the interactive ValoJump game for double the fun!

Party Rooms

Enhance your indoor playground with party rooms. Themed rooms for children's parties can account for up to 30% of total revenue. Choose exciting themes like pirates or fairy tales, or create an authentic jungle experience. It's an unforgettable attraction that keeps children and their guests coming back again and again.

Can also be combined with an interactive target system.

Multi-Sport Arenas

Multi-sport arenas, multifunctional fields, or courts offer the great advantage of accommodating various sports like football, basketball, and more—all with a single setup!

Go-Kart Tracks

We offer vehicles with an integrated fencing and barrier system, perfectly embedded within the play area. This ensures that children stay safely within the track while having fun. Additional revenue opportunities are possible through coin-operated or token systems. Our fleet includes bumper cars, e-cars, and pedal vehicles.

Before

Upgrades & Renovations

Does your indoor playground need an upgrade? Or are you looking to optimize unused spaces? To delight your regular guests and attract new customers, we offer new play elements, theming options, as well as lighting and sound effects.

Interested in the latest trends and discovering which new concepts provide the fastest ROI? We are happy to advise you.

An Unforgettable Experience!

The featured indoor playground was elevated through a redesign with a „Gold Digger“ theme. With glowing diamonds, treasure chests, and play equipment styled to match the gold rush era, you'll create a memorable environment with a unique and recognizable appeal.

After

Interactive Elements

The future is digital! We integrate interactive game events into our indoor playgrounds, meeting the highest quality standards. These features expand your play environment and offer a unique selling point. Interactive games are exciting, promote cognitive development, and even motivate those who are less active. These attractions captivate children, teenagers, and adults alike.

Climbing Walls

This climbing wall, designed specifically for indoor playgrounds, allows children to climb both upwards and sideways. The different colors of the climbing holds create individual climbing routes. Since the wall is not too high and equipped with safety mats, children can climb safely.
